### Notes:

1) Leg 1 times are normalized such that they are comparable with the other legs despite being slightly longer (clock was not started until leg 1 skier entered the tag zone right after the start).

2) Times are +/- a second or two because of the length of the tag zone.

3) The time of the tag between Sam and Ed was not recorded (temporary clock malfunction in the cold), therefore their leg times were not recorded. Sorry guys!
